

Screws

For years now Sound Cedar has been your choice for choosing the correct screw for your project. Our experience combines with a large supply to help fit your project with the screw types, coating and lengths it needs.

StrongDrive TIMBER Screws

The Strong-Drive SDWS Timber screw is designed to provide an easy-to-install, high-strength alternative to through-bolting and traditional lag screws. The Strong-Drive SDWH Timber-Hex SS screw provides a structural wood-to-wood connection, including for ledgers. As all Type 316 stainless steel fasteners, the Strong-Drive SDWH Timber-Hex SS screw offers maximum corrosion protection.

Deck Drive DSV WOOD Screws

The DSV screw is a powerful fastening solution for preservative-treated decking applications. With its under-head nibs and fast-start tip, the DSV is ideally suited to be driven and countersunk into today's wood deck boards. The shank is designed to withstand the swelling and shrinkage that is common with fast-growth lumber. Available in hand-drive and in collated strips for use in our Quik Drive auto-feed screw driving system, DSV screws are also offered in a variety of sizes to fasten fascia and trim.

Deck Drive DWP WOOD Screws

The DWP screw is a powerful fastening solution for deck, dock, and general exterior applications where extra corrosion protection is needed. With its specially designed sharp-point and unique box-threads, the DWP is ideally suited for the majority of wood used in today's deck boards. Choose Type 316 stainless steel for seaside and coastal environments. Available in hand-drive and in collated strips for use in our Quik Drive auto-feed screw driving system, DWP screws are also offered in a variety of sizes to fasten fascia and trim.

Trim Head Wood Decking Screws

The Trim Head screw is ideal for wood decking with a low profile head for minimal visibility and a choice of colors to match your decking material. The fast starting head design allows minimal installation time and a driver bit is included in each package.

Bugle Head Wood Decking Screws

The Bugle Head Wood Deck Screw is ideal to fasten all types of wood decking including cedar, redwood and preservative-treated woods (non-hardwood). The coarse threads on approximately 2/3 of the shank draw the decking and other material tightly to the framing.
