

Timber Fasteners

Timber Fasteners are needed when structural strength is required, and for larger board dimensions. This includes timber frame builds, attaching deck ledger boards or where larger fastener appearance is requested.

StrongDrive TIMBER Screws

The Strong-Drive SDWS Timber screw is designed to provide an easy-to-install, high-strength alternative to through-bolting and traditional lag screws. The Strong-Drive SDWH Timber-Hex SS screw provides a structural wood-to-wood connection, including for ledgers. As all Type 316 stainless steel fasteners, the Strong-Drive SDWH Timber-Hex SS screw offers maximum corrosion protection.
