

Trim Head Wood Decking Screws

The Trim Head screw is ideal for wood decking with a low profile head for minimal visibility and a choice of colors to match your decking material. The fast starting head design allows minimal installation time and a driver bit is included in each package.

Features

- Trim-style head is less noticeable on the decking surface
- Type-17 point for fast starts
- Coarse threads on approximately 2/3 of the shank draw the decking and other material tightly to the framing
- Driver bit included in each package
- 350-count packs contain enough screws to fasten 100 sq. ft. of decking (6" nominal-width boards installed on 16" o.c. joists)
- Choose Type 316 stainless steel for seaside applications and superior corrosion resistance
- Pre-drilling recommended near board ends to prevent splitting
- #7 and #9 x 3-1/2 screws: #1 square drive (replacement bit model BIT1S-2)
- #9 x 4" screw: #2 square drive (replacement bit model BIT2S-2)

Trim Head 316 Stainless Steel
